

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

V. *An Account of an Extra-Uterine Fœtus, taken out of a Woman after Death, that had continued five Years and an half in the Body.* By Robert Houftoun, M. D.

I Was sent for in *August* 1717, to a Woman near *Newport-Market*, who had been married eighteen Years to a Native of the *East Indies*, by whom she had eight Children, besides two Miscarriages. At my visiting her, now, she was with Child in a second Marriage, and her Husband a vigorous young Man.

She was near her full Time, and had felt Pains for several Days, which, returning by Intervals, she concluded, would, as usual, bring on her Delivery. Her Mother and her Midwife, apprehending no Difficulty, assured those about her, that only Time was wanting.

But I found, on Examination, that her Womb was of no Bulk to contain a Child near its Time; and that its Neck, of an uncommon Hardness, was also clos'd so straitly, as to refuse the least Admission, even of a small Probe or knitting Needle.

I declared upon this, that her Delivery was impossible; because the Child was not within the Womb, but between the Womb and the Guts: That it might be remov'd by a Passage to be made for it, without any great Pain, and with Safety to the Mother. I offer'd to undertake it, and assur'd them, that this was the only Opportunity; and that if she neglected it, it

would hereafter be out of the Power of Art to give her the Relief, she must languish for till Death, unless favour'd by some unlikely and extraordinary Accident.

However confidently I affirm'd it, they listened with a Mixture of Disbelief and Amazement, and rejected my Assistance. At that Time, in Probability, it would have been successful; for she was a slender well-shap'd Woman, in good Habit of Body, and of a sprightly Disposition.

It was a Year after this, when Mrs. *Hexel*, a noted Midwife in St. *James's* Parish, desir'd me again to visit her. I found her much disorder'd by a growing Imposthumation in her Belly: I order'd her some cordial Stomachicks, *Cassia*, and such gentle Lenitives; and they met a Success beyond my Expectation: So that, by aid of a regular Diet, and the watchful Exactness of a very tender Mother (a Nurse of above thirty Years Experience about this City) I restor'd her to such Strength, that she went chearfully Abroad, and re-appl'y'd herself to Business. I told her she might frankly benefit herself by my Advice, or my Medicines: And she call'd as she found Occasion.

But about fifteen Months from the Time when I visited her first, her Mother came from her to entreat my Assistance: She complain'd of great Pain in the lower Part of her *Abdomen*; and I found a Tumour of a conick Form, projecting about an Inch beneath the *Umbilicus*: Its Inflammation, with Tension, and a Feverishness attending it, so plainly indicated Suppuratives, that I was not surpriz'd to hear, in a few Days, that it had broke, as I wish'd.

I propos'd to lay it open, both to give a free Emission, and prevent its becoming fistulous; but she was apprehensive, that I would, as she call'd it, cut open
her

her Belly : So that not being able to prevail with her, I order'd a Pot of Unguent, and some Plaisters.

The Ulcer soon grew fistulous, and so continued till she dy'd, which was on the 23d of *March* last, in the 41st Year of her Age.

For above five Months before her Death, she voided her Excrements by this Vent, and all the soft Parts of the *Fœtus*, with some small Bones of its Fingers. But the rest of the *Skeleton* remaining entire, I took it out of her Body, together with the *Vagina*, *Uterus*, *Rectum*, &c. wherein it had involv'd itself, as may be seen more particularly in the Figure annexed.

Explication of the Figures.

Fig. 21.

A The *Clitoris*.

B B The *Nymphæ*.

C The *Rima*, or Entry into the *Vagina*.

D The *Bladder*.

E E The *Ureters* cut off.

F The *Uterus* sound and entire.

G The Left *Ovarium*.

H H The *Tubes*.

I Part of the *Colon* cut off.

K Part of the *Peritonæum*.

L Part of the *Ileum* cut off.

M Part of the *Cæcum*.

O Part of the *Cranium* that plainly appears.

P The Ulcer, through which the Excrements pass'd, with some small Bones.

Q Q Q Q The *Bulky Mass*, wherein the *Skeleton* is contain'd, between the *Uterus*, part of the *Vagina*, and *Rectum*.

R R Part of the *Cutis*.

She was full nine Months gone in *August* 1717, and dy'd the 23d of *March* 1723, on which Day I took it out.

Fig. 22. A Lateral View.

- A *Orificium Vaginae.*
- B *Anus.*
- C *Intestinum Rectum.*
- DDD The Mass, wherein the *Skeleton* is contain'd.
- E The *Costæ* plainly appearing.
- F The Bladder laid aside.
- G The *Ureter* cut off.
- H The *Uterus.*
- I The *Ovary.*
- K The *Tube.*
- L Part of the *Colon.*
- M The *Ulcer*, through which the Excrements pass'd, about one Inch beneath the Navel.
- N Bones in the Orifice of the *Ulcer.*
